To Whom It May Concern:

Momentum Data Systems has dealt with ACME PCB since 2002. During this time they have successfully handled many complex projects for us – both on quick turn prototypes as well as production runs. Their attention to quality and responsiveness has resulted in a preferred supplier status and an ongoing relationship with us. They understand the demands of a fast paced, high tech business while still remaining competitive price-wise. This relationship allows each company to focus on doing what they are best at – which is engineering. We look forward to a long lasting relationship and growth with Acme.
